

Two Fish Caught at Exactly the Same Time!

May 2nd 2020 was a very busy day on the Hudson River at Haverstraw Bay with at least 50 boats in the water. To my knowledge there were very few fish caught amongst these boats. I know because myself and Lex Filipowski were there as well.

What happened next is truly amazing. Nick Facciolo with his two daughters, Nicole age ten and her older sister Eva age eleven the only bites the trio had all day was when the two sisters poles went off at exactly the same time. Both fish were released alive.
