

The Good Beekeeper Plan

Keeping honeybees is now easy with the Good Beekeeper Plan!

The Good Beekeeper Plan facilitates hands-off beekeeping for the residents of New Jersey and New York!

Through this plan, HarBee offers a full-service honey bee management experience at your home. The bees, the woodenware in which they live, and the honey that they produce is yours while HarBee manages the colonies and keeps your bees healthy.

Taking Part in Sustainable Agriculture

Hosting hives in your yard in New Jersey-New York is a unique opportunity to improve the resilience of our food system. By bringing agriculture into a corner of your yard, you can produce 60 pounds of honey in one year.

Your bees will be involved in HarBee's bee breeding program and will provide evidence that food can be grown even in suburban and urban parts of the New Jersey-New York!

We perform monthly or as-needed inspections, maintain colony health throughout the seasons, and harvest the honey for you, extracting it and returning it to you in jars ready to use.

In order to find out if you can qualify for this program you can refer to the contacts in the HarBee ad or email Pat@HarBee.net
